

# Clalit — Hadar Clinic • Visit summary

Dr. Levi, family medicine • 04-812-3456 • Visit date 3 September

---

## PATIENT

Savta, 84. Attended with daughter.

## ASSESSMENT

Blood pressure raised on two visits (162/94 today). Type 2 diabetes stable. Mild knee osteoarthritis, reports pain on stairs. Appetite reported as reduced over the summer.

## MEDICATIONS

- **Amlodipine 5 mg** — start today, every morning.
- **Metformin 850 mg** — continue, twice daily with meals.
- Vitamin D 1000 IU — continue, once weekly.

## INSTRUCTIONS FOR THE FAMILY

- She should drink at least 1.5 litres a day; she tends to forget in the heat.
- Watch for dizziness when standing up, or swelling of the ankles, over the next two weeks (new blood-pressure tablet).
- Weigh her once a week, same time of day, and bring the numbers next visit.
- **Call me immediately if she falls, or if she is dizzy when standing.**

## FOLLOW-UP

Blood pressure check in three weeks. Bring the record.
